

Advantage Universal Telescope

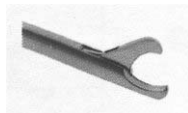

2.7mm 30° 175mm Universal telescope.
Ref: 2730175

2.7mm 30° 175mm Universal sheath.
Ref: 2730176

2.7mm 30° 175mm obturator.
Ref: 2730177

2.7mm Rigid Hook scissor ref: 2730177

2.7mm Rigid Grasping forcep ref: 2730178

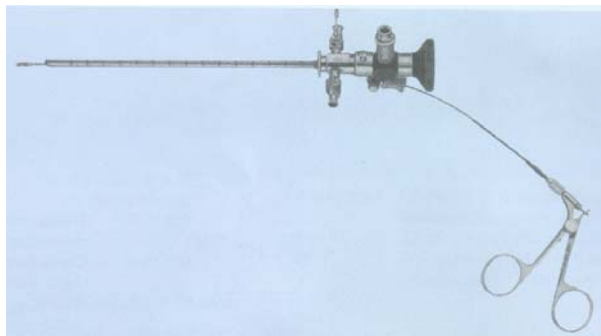

2.7mm Rigid Hook grasper ref: 2730179

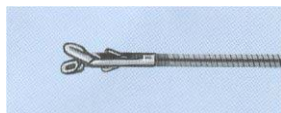

2.5mm Meniscus probe ref: 2730180

3.0mm spoon ref: 2730181

Operating Sheath for 2.7mm 30° 175mm Universal telescope. Allows for insertion of a flexible instrument. Commonly used for the removal of grass seeds from the nasal passage. Ideally used during Cystoscopy, Rhinoscopy and Otoscopy.
Ref: 2730182

5fr Biopsy forcep ref: 2730183

5fr Grasping forcep ref: 2730184

The Advantage Universal Telescope is a high quality traditional rod lens style telescope for use in a large number of applications. The approaches are either through natural body openings or can be created by means of a small incision. Applications include: Respiratory tract, Otoscopy, Thoracoscopy, Coelioscopy, Arthroscopy, Urogenital tract, Colonoscopy, Avian endoscopy and diagnosis of the oral cavity. Coupled with one of our Advantage camera systems the image can be projected onto screen and recorded for archive/presentation purposes.
