

## Advantage PLUSIMAGE

### Product Description

The Advantage PLUS is ideal for both flexible and rigid applications. Due to high quality German engineering and low, cost this camera is perfect for specialist referall practices wanting a higher quality endoscopy system, or to upgrade existing bulky lower quality units.

IMAGE denotes unit with intergrated image capture system. This allows the user to grab and store key images via control button on the camera head. The images can then be moved to USB stick for easy down load to Pc.

Advantage PLUS is a new single-chip CCD camera for endoscopic applications. High intergrated digital signal processing guarantees true colour reproduction. A 1/3" high resolution CCD-chip and a fast acting electronic processor ensure the highest quality image, high clarity and sharp detailed reproduction.

### Technical Data

Video system PAL ,CCD-sensor 1/3", 752(H) x 582(V) 440.000px, Shutter speed max. 1/100.000sec, Sensitivity 0.9 lux, F=1.4, SNR >44db, Video output 1 x FBAS / 1 x SVHS.

## Advantage Endoscopy accessories

### Endoscopy Trolleys

High quality German manufactured endoscopy trolleys. Constructed from either metal or wood and plastic with aluminium profiled sides and handy storage drawer options. The perfect trolley for your expensive endoscopy system.

### CRT and LCD Monitors

Offering the latest in flat screen technology or high resolution CRT monitors from top brand manufactures. Ask us about the options.

### DVD/HD recorder

High quality DVD recorder allows easy archiving of all endoscopy procedures. We also suggest DVD recorders with integrated hard drives which allow you to edit the information before saving to DVD.

### High quality camera drapes.

Revolutionary Concentric ring style simple two step fitting. Top quality drape for protecting the most valuable part of your endoscopy system. Sterile packed in boxes of 10.

### Olympus/Pentax® compatible eyepiece adaptor

A clever adaptor that converts the Flexible endoscopes direct view eyepiece into a "C mount" standard fitting. This will then allow you to couple your endoscope to a camera system and view endoscopes on screen.

### Olympus® compatible water bottle

By connecting the water bottle to your flexible endoscope and using the integrated air pump in our light source a jet of water can be sprayed across the tip of the endoscope cleaning away debris obscuring the view.

### LIGHT-WEIGHT Highly flexible, autoclavable Light guide.

Very soft and robust guide which can withstand tight bending without cable deterioration. Seeing is believing. 4.8mm dia, 1800mm or 2400mm.
